

Cherbear Open

June 21, 2014

Springvale Golf Course, N. Olmsted, Ohio

On November 22, 2013 Quinn was diagnosed with a massive brain tumor. On November 29th, 4 year old Quinn underwent extensive brain surgery to attempt to remove the tumor and determine what had caused it to grow. The doctors at Rainbow Babies and Children's Hospital were able to remove most of the tumor. However the nightmare was not over, some of the tumor had to be left behind as it was attached to a main artery in his brain and worse yet the diagnosis was an aggressive, rare brain tumor called sPNET.

You can make a difference for this family during one of the most difficult times in their lives. Your support will help pay for Quinn's medical expenses. On June 21, 2014, I will be hosting a golf outing to help this family with the medical expenses his family has accrued during this time. I am asking local businesses to show support by donating any items to this worthy cause. Should you be unable to donate goods or services, a monetary donation of any kind would be greatly appreciated and directly benefit this needy family. One-Hundred percent of all donations will go directly to this family.
